

ENGINEERS' DAY 2026

Competition Rules & Guidelines

ORGANIZED BY TECHVERSE AND SCHOOL OF ENGINEERING & TECHNOLOGY
CT University, Ludhiana

□ ENGINEERS' DAY 2026

TECHNICAL QUIZ COMPETITION

□ Objective

The event aims to encourage students to demonstrate their technical knowledge, logical thinking, problem-solving ability, awareness of engineering concepts, teamwork, and quick decision-making through a competitive quiz.

□ RULES & REGULATIONS

- 1. Eligibility:** The quiz competition is open to students of the School of Engineering & Technology.
- 2. Team Size:** Each team shall consist of 4 members.
- 3. Team Registration:** Each team must register with a unique team name before the commencement of the quiz.
- 4. Quiz Format:** The quiz will consist of questions based on engineering, technology, science, general technical awareness, logical reasoning, and related topics.
- 5. Question Allocation:** Each question will be addressed to only one team. The question will not be passed or transferred to any other team.
- 6. Marks:** Each question will carry 10 marks.
- 7. No Passing of Questions:** There will be no passing of questions between teams. Only the team to whom the question is assigned will have the opportunity to answer it.
- 8. Answering Time:** The Quiz Coordinator will provide a fixed time limit for answering each question. The time limit will be announced before the start of the quiz.
- 9. Final Answer:** Once an answer is given by the team, it cannot be changed after the Quiz Coordinator accepts the response.
- 10. Team Discussion:** All four team members may discuss the question among themselves before giving the final answer.
- 11. Answer Declaration:** Only the designated team member/captain shall give the final answer to the Quiz Coordinator.
- 12. Use of Electronic Devices:** Mobile phones, smartwatches, calculators, internet access, or any other electronic device will not be permitted during the quiz unless specifically allowed by the organizers.
- 13. Discipline:** Participants must maintain discipline and follow the instructions of the Quiz Coordinator and organizing committee throughout the event.
- 14. Audience Assistance:** Teams must not seek or receive answers from the audience or any person outside their team.
- 15. Fair Play:** Any attempt to communicate answers to or receive answers from another team will be considered a violation of the rules and may result in disqualification.
- 16. Tie-Breaker:** In case of a tie between two or more teams, a tie-breaker question/round may be conducted as decided by the Quiz Coordinator.
- 17. Quiz Coordinator's Decision:** The decision of the Quiz Coordinator and judging panel regarding answers, marks, time, and interpretation of questions will be final and binding.

Disqualification: A team may be disqualified for:

- Use of unauthorized electronic devices
- Receiving assistance from outside the team
- Misconduct or indiscipline
- Disrupting the quiz
- Violation of the quiz rules
- Any unfair means or malpractice

□ QUESTION PROCEDURE

1. The Quiz Coordinator will announce the question.
2. The question will be assigned to one specific team only.
3. The concerned team will be given the prescribed time to discuss and answer.
4. The team will provide its final answer.
5. A correct answer will earn 10 marks.
6. An incorrect or unanswered question will receive 0 marks.
7. The question will not be passed to another team.
8. The Quiz Coordinator will announce the correct answer.

□ IMPORTANT NOTE

All participants are requested to report at A3 before the commencement of the quiz for registration, team verification, and instructions.

Participants are expected to maintain proper discipline and sportsmanship throughout the competition.

The decision of the Quiz Coordinator and Organizing Committee will be final and binding in all matters related to the quiz.

ENGINEERS' DAY SPECIAL GAMING TOURNAMENT

COD Mobile • BGMI • Minecraft

GENERAL RULE GUIDE

1. Registration: Players must register through the official registration form. No on-the-spot registrations will be accepted.
2. Team/Player Changes: Players cannot change their registered team or player details after registration.
3. Fair Play: Cheating, hacks, scripts, modified files, unauthorized third-party tools, or any unfair advantage are strictly prohibited.
4. Exploits: Intentionally using glitches, bugs, exploits, or unintended game mechanics to gain an advantage is not allowed.
5. Punctuality: Players must join their assigned match/room on time. Late entry may not be allowed.
6. Technical Issues: Players are responsible for their own device, controls, and internet connection. Restarts will only be considered for major organizer/server-side issues.
7. Sportsmanship: Players must behave respectfully toward other participants, coordinators, and organizers. Abusive or disruptive behaviour may lead to disqualification.
8. Coordinator's Decision: The coordinator/organizers have the final authority on matches, results, disputes, rule violations, and technical issues. Players must not argue with or challenge the coordinator's decision.
9. Disqualification: Any serious rule violation, cheating, or misconduct may result in immediate disqualification.
10. Participation: By participating, players agree to follow all tournament rules and accept the organizers' final decisions.

1. COD MOBILE

Format: Initial rounds will use Frontline, TDM, or Hardpoint. The mode will be decided by the organizers on the spot.

Finals: The final will be Free-for-All (FFA). The player with the highest score/kills wins.

Additional: Disconnects generally will not result in a restart.

2. BGMI

Format: Battle Royale Custom Room. Room ID and password will be provided by the organizers.

Team Rules: Players must play only with their registered squad. Teaming with other squads is prohibited.

Scoring: Points will be awarded for final placement according to the announced scoring system.

Entry: Players must enter the room before the match starts; late entry may not be permitted

3. MINECRAFT

Version: EaglerCraft 1.8.8, using the version provided by the organizers.

Objective: Be the first player to craft a Diamond Block and place it in the nether dimension.

Restrictions: No hacks, X-Ray, Fly, Speed, Auto-Clickers, modified clients, duplication glitches, exploits, commands, or Creative Mode.

No Outside Assistance: Players must complete the challenge independently; outside players cannot provide resources or assistance.

Winning: The first verified player to place the Diamond Block wins.

PROMPT ENGINEERING COMPETITION

About the Event

The Prompt Engineering Competition is an individual-level AI challenge designed to test participants' creativity, observation skills, and ability to communicate visual ideas through carefully crafted prompts.

Participants will be provided with reference images and will have to create images that are as visually similar to the given references as possible using Google Gemini. The competition consists of three progressive rounds, each focusing on a different prompting technique: Zero-Shot, Few-Shot, and Role-Based Prompting.

The competition is not about simply generating an attractive image. Participants must carefully observe the reference image and translate its visual elements into an effective prompt.

1. General Rules

1. Individual Participation

This is an individual-level competition, and each entry can have only one participant. All prompts and generated images must be created by the participant independently.

2. Google Gemini Only

Participants may use Google Gemini only for AI-based image generation. No other AI image-generation platform or tool is permitted.

3. Independent Prompt Creation

All prompts must be written entirely by the participant. AI tools cannot be used to write, improve, rewrite, analyze, or optimize prompts.

4. Same Account Throughout

Participants must use the same Google Account throughout the competition. The account should have access to the required Gemini image-generation features.

5. Following Organizer Instructions

Participants must follow all instructions provided by the organizers during the competition. Any attempt to deliberately bypass the competition rules may lead to disqualification.

6. Final Decision

The decision of the judging panel regarding scores, winners, and rule violations will be final and binding.

2. Google Gemini Student Access

1. Student Access

Participants may use the Google AI Student offer to access the required Gemini features, subject to Google's eligibility and offer conditions.

2. Registration Link

Participants can check their eligibility and activate the student offer through the link provided by the organizers: <https://one.google.com/ai-student>

3. Account Responsibility

Participants are responsible for ensuring that their Google Account has access to Gemini's required image-generation features before the competition begins.

4. Account Consistency

The Google Account used during the competition must be the same account used to access the participant's Gemini features. Participants should not switch accounts during a round.

5. Technical Responsibility

Participants are responsible for their account activation, eligibility, internet connection, and device. Individual account or access issues may not result in additional competition time.

3. AI Usage Policy

The competition is designed to test the participant's own prompt engineering skills. Therefore, AI assistance for prompt creation or analysis is strictly prohibited.

Allowed

1. Image Generation

Participants may use Google Gemini to generate images based on their own prompts.

2. Manual Prompt Refinement

Participants may edit, modify, and refine their own prompts manually during the allotted time.

3. Multiple Generations

Participants may generate multiple versions of an image and select their best output, subject to Gemini's available generation limits.

Strictly Not Allowed

1. AI-Generated Prompts

Participants cannot use ChatGPT, Claude, Copilot, Perplexity, Gemini, or any other AI tool to create or improve their prompts.

2. AI Image Analysis

Participants cannot use AI tools to analyze the reference image or extract its visual details for them.

3. External Prompt Generators

AI prompt generators, AI-powered writing assistants, or any similar service that helps create or optimize prompts are prohibited.

4. External AI Image Tools

Participants cannot use any AI tool other than Google Gemini to generate, modify, enhance, or recreate the required images.

Important

The participant must personally observe the reference image and formulate the prompt. Permitted workflow:

Reference Image → Participant observes → Participant writes prompt → Google Gemini generates image

Not permitted:

Reference Image → AI analyzes/writes prompt → Participant uses AI-generated prompt → Gemini generates image

4. Reference Image Rules

1. Two Images Per Round

Participants will receive two reference images in each round. A separate generated image must be submitted for each reference image.

2. Reference Images as Visual Targets

The reference images are provided only as targets for recreation. Participants must rely on their own observation and prompt-writing skills.

3. No Reference Image Upload

Participants cannot upload the reference image to Gemini or any other AI tool. Image-to-image or reference-image-based generation is strictly prohibited.

4. No External Analysis

Participants cannot use AI or any external service to analyze, describe, or extract information from the reference images.

5. Competition Structure

The competition consists of three progressive rounds.

Round	Difficulty	Prompting Technique	Images	Time
Round 1	Easy	Zero-Shot Prompting	2	30 Minutes
Round 2	Medium	Few-Shot Prompting	2	45 Minutes
Round 3	Hard	Role-Based Prompting	2	60 Minutes

Total Competition Time: 2 Hours 15 Minutes

6. Round 1 — Easy

Zero-Shot Prompting

Time: 30 Minutes

Participants will receive two reference images and must create prompts from scratch to generate visually similar images.

1. No Examples

Participants must use zero-shot prompting and cannot provide examples to Gemini as part of the prompting technique.

2. Manual Prompting

The complete prompt must be written by the participant without assistance from any AI tool.

3. Prompt Refinement

Participants may manually modify their prompts and regenerate images within the 30-minute time limit.

4. No Reference Upload

The reference images cannot be uploaded to Gemini for direct recreation or image-to-image generation.

7. Round 2 — Medium Few-Shot Prompting Time: 45 Minutes

Participants will receive two reference images and must use the few-shot prompting technique to guide Gemini toward the desired visual output.

1. Use of Examples

Participants may provide examples as part of their prompt to demonstrate the desired characteristics or output.

2. Participant-Created Examples

Any examples, instructions, or prompts used must be created by the participant themselves and not generated by another AI.

3. No Reference as Example

The provided reference image cannot be uploaded or used directly as an example for Gemini.

4. Manual Refinement

Participants may manually refine their prompts and regenerate images during the allotted time.

8. Round 3 — Hard Role-Based Prompting Time: 60 Minutes

Participants will receive two reference images and will be required to use the role assigned by the organizers while creating their prompts.

1. Assigned Role

Participants must use the specific role provided by the organizers in their prompting approach.

2. Meaningful Role Usage

The assigned role should be meaningfully incorporated into the prompt and used to influence the generation process.

3. Independent Prompt Creation

Participants must personally write the complete prompt without assistance from any AI tool.

4. Manual Refinement

Participants may manually modify and refine their prompts during the 60-minute round.

5. No Reference Upload

Reference images cannot be uploaded to Gemini or used for image-to-image generation.

9. Image Generation Rules

1. Gemini-Generated Images Only

Every submitted image must be generated using Google Gemini.

2. No External Editing

Participants cannot use Photoshop, Canva, or other image-editing software to modify the generated image unless specifically permitted by the organizers.

3. No Image Enhancement Tools

AI upscalers, enhancement tools, image-to-image tools, or similar services cannot be used to improve the final image.

4. Multiple Attempts

Participants may generate multiple versions during the allotted time, subject to Gemini's generation limits.

5. Final Output

Only the final image selected and submitted by the participant will be considered for judging.

10. Submission Rules

1. Timely Submission

All final images must be submitted before the respective round's time limit ends. Late submissions may not be accepted.

2. Two Images Per Round

Participants must submit two final images per round, one corresponding to each reference image.

3. Image and Actual Prompt Submission

Along with each final image, participants must submit the exact prompt they actually used to generate that image. The submitted prompt must match the prompt used in Google Gemini for the corresponding final image.

Gemini History Verification

Organizers may ask participants to show their Gemini conversation/history to verify that the submitted image and prompt follow the competition rules.

4. No Changes After Submission

Once the submission deadline has passed, participants cannot modify or replace their submitted work.

11. Fair Play & Disqualification

- Using another AI tool to create, improve, or optimize prompts.
- Using AI to analyze the reference images.
- Uploading reference images to an AI tool.
- Using image-to-image generation.
- Using unauthorized image-editing or enhancement tools.
- Receiving assistance from another person.
- Sharing prompts or solutions with other participants.
- Using another participant's work.

- Attempting to bypass technical restrictions.
- Violating any instruction given by the organizers.
- Any other form of unfair assistance or misconduct.

The organizers reserve the right to disqualify a participant immediately in case of a serious rule violation.

12. Internet & External Resources

1. Internet Usage

Participants may use normal internet resources only if permitted by the organizers.

2. No AI Assistance

Internet access must not be used to access AI tools, AI prompt generators, or AI-powered services for creating or improving prompts.

3. Organizer Restrictions

The organizers may restrict internet access if required to maintain fairness and prevent unauthorized assistance.

13. Time Management

1. Participant Responsibility

Participants are responsible for managing their own time during each round.

2. End of Round

Once the timer ends, participants must stop working and follow the submission instructions provided by the organizers.

Submission Time

Participants should keep sufficient time for final image generation and submission before the deadline.

14. Technical Issues

1. Pre-Competition Check

Participants should verify their Google account, Gemini access, device, and internet connection before the competition begins.

2. Platform-Wide Issues

Technical issues affecting Gemini or the competition system at an organizer/platform level will be handled at the discretion of the event coordinators.

3. Reporting Issues

Participants must immediately inform the organizers about genuine technical problems rather than attempting unauthorized solutions.

15. Participant Checklist

- Have a working Google Account.
- Activate/check access to the Google AI Student offer.
- Ensure Google Gemini image generation is available.

- Bring a fully charged laptop.
- Ensure reliable internet access.
- Be familiar with basic prompt-writing concepts.
- Be prepared to write all prompts independently.

Final Note

The Prompt Engineering Competition is designed to reward creativity, observation, precision, and the ability to communicate effectively with AI through prompts.

Participants should focus on understanding the visual details of each reference image and translating those details into effective prompts.

The goal is not to write the longest prompt — the goal is to write the most effective prompt.

MEME MAKING COMPETITION

Competition Guidelines, Rules & Evaluation Criteria

1.What is Meme Making?

Meme making is the creative process of combining images, text, captions, graphics, or other visual elements to communicate an idea, situation, joke, or message in a short, humorous, and engaging format. Participants are expected to use their creativity to produce an original meme that communicates the given idea effectively.

2.Objective of the Competition

The competition aims to encourage creativity, humour, originality, quick thinking, visual communication, and digital design skills. Participants will be challenged to create memes both on topics of their choice and on themes announced by the organizers.

3.Competition Format

The competition will consist of THREE rounds. Each round will test a different aspect of meme-making ability.

Round 1 – Open Choice Round

- All registered participants can participate in Round 1.
- Participants may choose any suitable topic or concept of their choice.
- The meme must be original and created by the participant.
- The meme must be decent, creative, respectful, and suitable for a public/college event.
- The best-performing participants will qualify for Round 2 based on the organizers' announced selection criteria.

Round 2 – Given Theme Round

- A specific theme/topic will be announced by the organizers at the beginning of the round.
- Participants must create their meme strictly according to the announced theme.
- After the 5-minute material-collection period, participants must work on their meme using the permitted resources.
- Only participants qualifying from Round 1 may participate in this round.

Round 3 – Challenge Round

- A new and potentially unexpected theme/topic will be announced by the organizers.
- Participants must create a meme based on the announced theme within the given time.
- This round will emphasize creativity, humour, relevance, originality, and the ability to create under pressure.
- Only participants qualifying from Round 2 may participate in the final round.

Suggested Round Flow

Round	Theme	Internet	Participants
Round 1	Participant's Choice	Maximum 5 minutes	All registered participants
Round 2	Theme given by organizers	Maximum 5 minutes	Qualified participants
Round 3	Final Challenge Theme	Maximum 5 minutes	Finalists

2. General Rules

- Each participant will compete individually.
- Each participant can submit only ONE meme per round.
- Meme creation may be digital using any permitted editing/designing software or app.
- The final meme must be submitted in JPG or PNG format.
- The meme must be submitted before the deadline announced by the organizers.
- The meme must be decent, creative, respectful, and appropriate for the event.
- Personal attacks, hateful, discriminatory, obscene, sexually explicit, or otherwise inappropriate content is not allowed.
- Copied memes or substantially reused content will be treated as plagiarism and may lead to disqualification.
- Participants must follow the instructions and time limits announced by the organizers.
- The organizers may reject any submission that violates the competition rules.

3. Originality & Copyright

- The submitted meme should be substantially created by the participant.
- Participants should avoid using copyrighted material without permission where such permission is required.
- If third-party material is used where permitted, appropriate credit should be given when required.
- Using another person's meme and making only minor changes will not be considered original work.
- The organizers reserve the right to disqualify content that appears plagiarized or improperly used.

4. Internet Usage Rule

- Internet access is allowed ONLY for a maximum of 5 minutes in EACH of the THREE rounds for collecting/reference material related to the meme.
- Participants should not use the internet beyond the permitted 5-minute period in any round.
- The organizers may monitor or control internet access during all rounds of the competition.
- Use of online meme generators, AI-generated content, or other online creation tools may be restricted if

announced by the organizers before the competition/round.

- Any attempt to bypass the internet restriction may result in disqualification.

5. Submission Guidelines

1. Create the meme according to the rules and the theme applicable to the round.
2. Save/export the final meme in JPG or PNG format.
3. Submit the file using the submission method specified by the organizers.
4. Ensure that the file is submitted before the announced deadline.
5. Late submissions may not be accepted.

6. Judging Criteria

Criteria	Weightage
Creativity & Originality	30%
Humour	25%
Relevance to Theme / Concept	25%
Visual Presentation	10%
Overall Impact	10%

For Round 1, 'Relevance to Theme / Concept' will refer to how effectively the meme communicates the participant's chosen topic or concept.

7. Selection & Qualification

- The organizers will announce the number of participants qualifying from each round before or during the event.
- Scores may be used to determine qualification for the next round.
- In case of a tie, the organizers/judges may use originality, humour, relevance, or an additional tie-breaker criterion.
- The final round will determine the winners based on the announced judging process.

8. Disqualification

- Plagiarism or submission of copied/substantially reused memes.
- Violation of the 5-minute internet restriction.
- Submission of inappropriate, offensive, hateful, discriminatory, or obscene content.
- Use of prohibited tools/resources if such restrictions are announced by the organizers.
- Submission after the deadline, where late submissions are not permitted.
- Any attempt to manipulate, interfere with, or unfairly influence the competition.

- Any other violation of the competition rules may result in immediate disqualification.

9. Judges' Decision

The decision of the judges will be final and binding. The organizers reserve the right to interpret the rules, resolve disputes, modify the competition procedure when necessary, and take appropriate action in situations not specifically covered by these guidelines.

10. Participant Checklist

- Create original content.
- Follow the theme applicable to the round.
- Keep the meme decent and respectful.
- Follow the time limit.
- Use internet only within the permitted 5-minute window in EACH round.
- Submit only one meme per round.
- Check the file format (JPG/PNG) before submission.
- Submit before the deadline.

3 wheel-Ideathon

1. Theme: Three wheels will be provided, each containing different categories.
2. Task: Each participant/team must generate one combination by spinning all three wheels. *(Combination obtained cannot be changed, unless the organizers decide that the combination is technically impossible or duplicated.)*
3. The idea must be directly relevant to all three elements generated by the wheels.hh
4. Feasibility: The idea should be realistic and practically implementable. Participants should avoid ideas that are purely imaginary or impossible with currently available technology/resources.
5. The judges' decision regarding evaluation and scoring will be final.
6. Duration: Each participant/team will have 4-5 minutes to present their innovative idea.
7. Question and Answer Round: After the idea pitching, there will be a 2–3-minute Q&A session with the jury/judges.

Context Requirements:

- Problem Statement: Describe the problem statement.
- Innovation: Explain the innovative solutions to your problem.
- Feasibility of the idea: Highlight uniqueness and potential scalability of the content.
- Social Acceptability: Highlight the social acceptability of your idea.

Evaluation Criteria:

Your pitching will be evaluated based on the following prospects:

- Problem understanding (25 percent)
- Concept clarity (25 percent)
- Feasibility of Idea (25 percent)
- Pitching and way of deliverance (25 percent)

General Rules:

- Registration: All participants must be registered for the event by the specified deadline.
- Adherence: Follow the instructions and guidelines provided by the event organizers and coordinators.
- Plagiarism: The entire content must hold the originality. Showcasing fake data from any resources will lead to disqualification.

We look forward to your innovative presentations and wish you the best of luck in the 3-Wheel Ideathon 2026.

ONLINE POSTER MAKING COMPETITION

Rules & Guidelines

1. Mode: The competition will be conducted online. Participants must create a digital/soft-copy poster using Canva.
2. Theme: The poster must be based on the theme announced by the organizers and should clearly represent it.
3. AI PROHIBITED: Use of Artificial Intelligence is strictly prohibited. Participants must not use Canva AI, ChatGPT, Gemini, AI image generators, AI writing tools, or any other AI-based tool for generating or designing any part of the poster.
4. Originality: The poster must be the participant's own creative work. Copying or submitting an already-existing poster/design from Google, Pinterest, Instagram, Canva, or any other source is strictly prohibited.
5. Time Limit: The poster must be completed and submitted within the given time limit. No extension will be provided after the deadline.
6. Content: The poster must be creative, relevant, informative, and appropriate. Offensive, vulgar, hateful, discriminatory, or misleading content will not be accepted.
7. Submission: Participants must submit the final soft copy through the official submission method before the deadline. Participants are responsible for submitting the correct and final file/link.
8. Technical Responsibility: Participants are responsible for their own device, internet connection, Canva account, and saved work. Technical issues will not automatically result in extra time.

9. Judging Criteria: Posters will be judged on:

- Creativity & Originality
- Relevance to Theme
- Visual Appeal & Design
- Concept/Message
- Overall Presentation

10. Disqualification: Use of AI, plagiarism, copying, cheating, unauthorized assistance, inappropriate content, or any violation of the competition rules may result in immediate disqualification.

11. Verification: Organizers may ask participants to explain their design process or verify the originality of the poster if required.

12. Final Decision: The decision of the judging panel and organizing committee will be final. Any genuine concern must be raised with the organizers.

⚠️IMPORTANT

The poster must be created manually by the participant using Canva. No AI-generated text, images, designs, or other AI-assisted content will be permitted.

BEST OUT OF WASTE COMPETITION

Venue: Workshop Basement Time: 10:00 AM onwards

Objective

The event aims to encourage students to demonstrate creativity, innovation, engineering thinking, teamwork, and environmental awareness by converting waste or discarded materials into useful and innovative products.

RULES & REGULATIONS

1. Eligibility: The competition is open to students of all Engineering Departments.
2. Team Size: Each team may consist of 2–4 students.
3. Theme: Participants must create a useful, innovative, or decorative product using waste/recycled materials.
4. Materials: Participants should primarily use waste, scrap, discarded, or recyclable materials such as cardboard, plastic bottles, metal scraps, wires, wood pieces, old mechanical components, packaging materials, etc.
5. New/Readymade Products: The use of commercially available ready-made products as the main component is not permitted.
6. Tools & Equipment: Participants may bring their own basic tools and equipment required for fabrication. They must use workshop facilities only with the permission of the concerned faculty/lab staff.
7. Safety: Proper safety precautions must be followed throughout the event. Participants must handle cutting tools, electrical equipment, welding equipment, and other workshop tools responsibly.
8. Time Limit: Participants must complete and present their project within the time allotted by the event coordinators.
9. Originality: The project should be original and developed by the participating team. Plagiarized or copied models may be disqualified.
10. Presentation: Each team will briefly explain:
 - Name of the project
 - Waste materials used
 - Working/principle
 - Engineering concept involved
 - Utility/application
 - Environmental benefits
11. Judging Criteria: Projects will be evaluated on:

- Creativity & Innovation – 25 marks
- Effective Use of Waste Materials – 20 marks
- Engineering Concept/Functionality – 20 marks
- Utility & Practical Application – 15 marks
- Finishing & Presentation – 10 marks
 - Environmental Impact – 10 marks Total: 100 Marks

12. Cleanliness: Participants must keep their working area clean and dispose of leftover waste responsibly.

13. Safety & Discipline: Any unsafe activity, misbehavior, damage to university property, or violation of workshop safety rules may result in disqualification.

14. Project Submission: The completed model must be presented to the judges at the designated time.

15. Judges' Decision: The decision of the judging panel will be final and binding.

16. Disqualification: A team may be disqualified for:

- Use of prohibited/unsafe materials
- Copying another participant's idea/model
- Misconduct
- Failure to follow safety instructions
- Exceeding the permitted time
- Damage to workshop equipment or university property

17. Certificate & Prizes: Certificates and prizes will be awarded to the winning teams as per the event guidelines.

Suggested Awards

- ☐ 1st Position – Best Innovative Model
- ☐ 2nd Position – Most Creative Model
- ☐ 3rd Position – Best Utilization of Waste
 - 🏆 Best Eco-Friendly Idea
 - ⚙️ Best Engineering Concept

Important Note

Participants are requested to report at the Workshop Basement by 9:45 AM on 15 September 2026 for registration and instructions.

Organizing Department:

Mechanical Engineering Department CT University, Ludhiana

AUTO CAD DESIGN COMPETITION

Rules & Regulations

1. The competition will be organized on 15 September 2026 as part of the Engineers' Day Celebration.
2. Students from all departments of CT University are eligible to participate.
3. The competition will be based on AutoCAD 2D design/drafting.
4. The design/drawing/problem statement will be provided by the Department of Mechanical Engineering at the time of the competition.
5. Participants must prepare the given design individually using AutoCAD.
6. Participants must report at the venue before 12:00 PM for registration and necessary instructions.
7. Participants will be required to complete the given drawing within the time limit announced by the organizing committee.
8. Participants must use the AutoCAD software and computer system provided/approved by the organizing committee.
9. Participants are not allowed to use:
 - Ready-made drawings
 - Previously prepared AutoCAD files
 - Internet resources for copying the given design
 - Assistance from other participants
10. Participants must follow the dimensions, scale, layers, line types and other drafting instructions provided by the organizers.
11. The design must be completed accurately and submitted before the specified submission time.
12. Judging Criteria:
 - Dimensional accuracy
 - Drawing accuracy
 - Proper use of AutoCAD commands
 - Layer and line-type management
 - Neatness and presentation
 - Completion within the given time

- Overall technical quality

13. In case of a tie, the participant who completes the drawing with better accuracy and in less time may be given preference.
14. Any form of unfair means, copying, malpractice or outside assistance will result in immediate disqualification.
15. Participants must maintain discipline and follow the instructions of the faculty coordinators and organizing committee.
16. The decision of the judging panel/organizing committee will be final and binding.
17. The organizers reserve the right to modify the rules, time limit or other arrangements if required.

Competition Objective

The objective of the competition is to provide students with an opportunity to demonstrate their technical drawing skills, AutoCAD proficiency, accuracy, creativity and engineering design knowledge, irrespective of their department.

All the best to all participants!

ICE-CREAM STICK BRIDGE MAKING COMPETITION

Team Size: 2 members. Duration: 2 Hours.

Description: A bridge-making competition to design and construct a strong, stable, and creative bridge using ice-cream sticks within the given time and design requirements.

Rules:

Each team shall consist of 2 members only.

- Both team members must actively participate in the design and construction of the bridge.
- Each student can participate in only one team.
- Participants must bring their own ice-cream sticks.
- Adhesive/glue may be used for joining the ice-cream sticks.
- No other structural materials such as wooden pieces, metal wires, cardboard, plastic strips, bamboo, etc. are permitted.
- Decorative materials, if used, must not contribute to the structural strength of the

bridge.

- The bridge must be constructed within the specified dimensions and clear span provided by the organizers.

- The bridge must be self-supporting, structurally stable, and capable of carrying the

specified test load.

- Participants may prepare sketches or design concepts before the competition; however, the bridge must be constructed at the competition venue.

- No pre-assembled bridge or major bridge component may be brought from

outside.

- Construction shall be carried out only within the allotted 2-hour competition time.

- No modification will be permitted after the submission deadline.

- Each completed bridge will be inspected and tested by the organizing committee/judging panel.

- Evaluation will be based on maximum load-carrying capacity, structural stability,

design, creativity, construction quality, and compliance with the specified requirements.

- The decision of the judges will be final and binding.

AutoCAD competition

Team Size: 1 member.

Duration: 1 hour 30 minutes.

Description: An AutoCAD design competition to create an accurate, creative, and technically sound drawing based on a given problem statement.

Rules:

- The drawing/problem statement will be disclosed at the start of the event.
- Participants must bring their own laptop with AutoCAD installed and ready to use.
- Participants should bring their own laptop charger and mouse.
- Participants may use standard AutoCAD commands, tools, blocks, layers, dimensioning tools, and built-in features.
- Participants may use AutoCAD Help/documentation and online references for

understanding commands and technical information.

- Pre-prepared drawings, completed solutions, or task-specific templates are not allowed.
- Copying another participant's work or using external assistance during the

competition is strictly prohibited.

- Originality, accuracy, drafting standards, dimensioning, and presentation will be highly valued.
- The final drawing must be completed and submitted within the allotted time.

The decision of the judges will be final and binding.

Tech IMPOSTER

1. What this Event is About

Tech Imposter is a fun game designed for all-year university students. The goal of the game is to test basic tech awareness, communication skills, quick thinking, and bluffing.

In this game, human teams are given a specific tech term (e.g., Canva), while one secret team (The AI Imposter) is given a highly similar tech term (e.g., Adobe Illustrator).

Teams must discuss the concept out loud using descriptive keywords without ever saying the actual name of the term. At the end of the round, teams must catch the imposter through voting. It requires zero coding knowledge, making it 100% fair and engaging for all college years.

2. Participation Limit

Format: Duo Teams (Pairs of 2 students per team).

3. How the Event will be Organized

The event will run for multiple rounds so that no team is eliminated early, keeping everyone active and engaged until the very end.

Step 1: The Chit Draw

The host prepares paper chits. 7 to 8 chits will have the "Human Word" (e.g., Canva) and 1 secret chit will have the "Imposter Word" (e.g., Adobe Illustrator). Teams pick their chits secretly.

Step 2: The 2-Minute Research Window

Since some tech terms might be completely new to 1st-year students, every team gets 1 to 2 minutes to quickly research their specific term on their mobile phones.

Step 3: Total Phone Lockdown

As soon as the 2-minute timer ends, all phones must be switched off or put face-down on the table. No phone use is allowed after this.

Step 4: The Taboo Discussion (3 to 5 Minutes)

The game begins. Teams take turns speaking out loud about their topic.

Rule: They cannot say the exact name of their term.

For example, if the word is Canva, they must describe it using words like "Artistic", "Designs", or "Templates". The Imposter team must try to blend in by using general descriptive words that fit both terms.

Step 5: The Guessing & Voting Phase

After 3 to 5 minutes of discussion, the host stops the game. A 5-minute open accusation round happens where teams guess who the liar is, followed by a secret vote.

4. Rules and Regulations

No Direct Naming: If a team accidentally says the exact name of the word on their chit, they lose that round instantly.

Strict Phone Ban: Phones can only be used during the initial 1–2 minute research window. Any team caught using a phone during the discussion or voting phase will be disqualified.

Respect the Timer: Teams must stop talking immediately when the host calls time.

No Collaboration: Teams cannot talk to other teams during the research or preparation phase.

5. Points Addition Table (Scoring System)

Points are tracked on a whiteboard by the host at the end of every round. No team is eliminated; points just keep adding up.

Team Type	Condition / Action	Points Awarded
Human Team	Correctly identifies and votes for the actual AI Imposter team.	+1 Point to each human team that voted correctly.
AI Imposter Team	Human teams guess wrong and the Imposter successfully survives the round.	+1 Point to the Imposter for every wrong vote received from humans.

6. Selection Criteria for the Winner

The tournament will run for multiple rounds with different tech word pairings. At the end of the event, the host will total the scores.

The duo team with the highest cumulative points will be declared the official Grand Winners of the Tech Imposter event.

Tie-Breaker: If two teams have the same points, a 1-round rapid sudden death voting match will be held to decide the final winner.
